SCIK PURAL ACRIL AL TITANIO

Matt, pigmented, acrylic insulation, for internal and external use

DESCRIPTION

SCIK PURAL ACRIL AL TITANIO is an acrylic insulation characterized by an excellent filling and penetrating power, which can also consolidate the wall supports in presence of crumbling surfaces, patches or flaws.

The main purpose of this product is to improve the cohesion and standardize the support absorption, in order to create the ideal anchorage for the next layers of paint, isolating these from the alkaline environment.

APPLICATION

Wall, gypsum, plasterboard:

- The surface to be treated must be dry. Conditions and thickness of the plaster layer affect the drying and hardening time, so make sure it has at least 28 days of curing time.
- Remove any layers of old paint or imperfectly anchored parts and sand the entire surface.
- Use the sandpaper in order to remove surface irregularities and then eliminate dust deposits.
- Make sure the surface is dry and proceed applying with brush or roller 1 coat of SCIK PURAL ACRIL AL TITANIO, ready to use.
