ACQUARIA IMPREGNANTE TRASPARENTE

Water-based transparent finishing for wood

DESCRIPTION

ACQUARIA IMPREGNANTE TRASPARENTE is a water-based transparent finish for wood, to be applied outside and inside. The product is suitable for the treatment of all wood products that require excellent resistance to atmospheric agents and ultra violet rays. The product does not alter the appearance and grain of the wood on which it is applied.

ACQUARIA IMPREGNANTE TRASPARENTE is very easy to apply, with excellent dilatation that allows you to follow the appearance and grain of the wood without flaking and maintains a uniform color. Moreover, the product has a rapid drying as well as having a very low environmental impact.

APPLICATION

NEW WOOD:

Sand the wood to remove any raised wood splinters.

Clean the surface and check that the wood is not damp.

Fill imperfections with PASTA STUCCO. Sand the grouting and remove dust.

After 6-12 hours, proceed with brush or spray to the application of 2 coats of ACQUARIA IMPREGNANTE TRASPARENTE, ready to use (or with a max 5% of water). Mix the product well before use. Allow about 4-6 hours to pass between the two coats.

Avoid application in case of temperatures lower than 5°C and higher than 30°C, do not apply in case of relative humidity always higher than 85% and under direct sunlight or in case of probable rain.

ALREADY VARNISHED WOOD:

Check the condition of old varnishes. Remove peeling or not perfectly adhering parts and clean with care.

Proceed as for new wood surfaces from the second point onwards.
