

## **SAHARA PREMIUM ORO**

Bright decorative finishing coat with sand motion effect

### **DESCRIPTION**

SAHARA PREMIUM ORO is a decorative finishing coat with special resins, natural fillers and fine glass grains structure, which create a sand motion effect.

The product can be used in both classic and modern environments thanks to the numerous base and color variations, satisfying the most demanding requirements and the most refined tastes.

SAHARA PREMIUM ORO is available in the following bases:

GOLD, ANTIQUE GOLD, BRONZE, COPPER, RED COPPER

SAHARA PREMIUM ORO can also be requested in the following grain sizes: FINO (Fine) and GROSSO (Coarse).

SAHARA PREMIUM ORO can be mixed with the special glitter STELLA GLITTER gold or silver, or the traditional glitter gel POLVERE DI STELLE (Stardust).

### **APPLICATION**

- The surface to be treated must be dry. Conditions and thickness of the plaster layer affect the drying and hardening time, so make sure it has at least 28 days of curing time, depending on temperature.
- The substrate has to be well prepared and suitable for coating: dry plaster, not any granules from plaster. In case of old walls make sure there is no poor or dusty paint: remove them if necessary as well as flaking paint.
- Apply 1 coat of SCIK PURAL ACRIL insulation if necessary.
- Apply with a brush or roller, one or two coats of DECOR FONDO which has to be thinned up to 5-10 % with water.
- Allow to dry perfectly, depending on the temperature (from 6 to 12 hours).
- After checking the color chart, add to the base, the quantity of dye necessary to obtain the desired colour.
- Proceed applying SAHARA PREMIUM ORO with the SPALTER BRUSH (mm100 or mm70), creating diagonal or alternating effects.
- Allow to dry to appreciate the effect.
- Depending on the color chosen from the color chart or according to personal taste, a second coat of SAHARA PREMIUM ORO can be applied.
