SAHARA OASI
Decorative painting

DESCRIPTION

SAHARA OASI is the absolute novelty in terms of decoration as it comes from the idea of combining multiple colors, applied simultaneously.

Unique for its iridescent and the special colour effects of the 3D, recalls the aspect of a fresh summer oasis, so that the final result will be sensational.

SAHARA OASI is completely washable, does not absorb odors and rejects dust.
The ease of application makes SAHARA OASI the right product for large surfaces where elegance and decoration are required.

APPLICATION

- The surface to be treated must be dry. Conditions and thickness of the plaster layer affect the drying and hardening time, so make sure it has at least 28 days of curing time, depending on temperature.

- The substrate has to be well prepared and suitable for coating: dry plaster, not any granules from plaster. In case of old walls make sure there is no poor or dusty paint: remove them if necessary as well as flaking paint.

- Apply 1 coat of SCIK PURAL ACRIL insulation if necessary.

- Apply one or two coats of DECOR FONDO OASI ready to use (white, black or coloured as for colour chart).

- Allow to dry perfectly (from 12 to 24 hours).

- Choose from the color chart at least two CANGIANTE OASI colors, which are available in: GOLD, SILVER, BLUE, GREEN, RED, ORANGE, PURPLE. Pour the contents of the first CANGIANTE OASIS into a 750 ml SAHARA OASI package and then pour the contents of the second CANGIANTE OASI into another 750 ml SAHARA OASI package.

  For example: choosing GOLD and BLUE opalescent paste colors, the procedure would be as follows:

1- SAHARA OASI NEUTRO 750 ml + PASTA CANGIANTE ORO (gold opalescent paste) 125 ml

2- SAHARA OASI NEUTRAL 750 ml + PASTA CANGIANTE BLUE (blue opalescent paste) 125 ml

- Proceed applying SAHARA OASI using the special SPALTER DUO tool, which is made up of two SPALTER 70 brushes that allow the simultaneous application of two different colors. Please pay attention to never invert the two brushes with their cans.

- Apply the decoration on the surface in an alternating and uniform way, performing cross movements and mixing the two opalescent colors with different intensity on the whole surface.

- When the product is drying (wait at least 10-15 min) , level the surface and smooth out the superimposed product, thus recreating the typical water effect of an oasis.

- Allow to dry completely to appreciate the OASI 3D effect.

TECHNICAL DATA

Nature of the bond	Acrylic
Viscosity	
Drying Time	12 h complete.
Thinning	Ready to use
Yield	5-6m²/Lt
Specific weight	1,07Kg/Lt
Colors	Neutral, Silver, Gold, Blue, Orange, Red, Purple, Green
Dry aspect	Liquid mellow
Wet aspect	Opalescent, luminescent and 3D effect
Storing	Max Temp. +30°C, Min T. +5°C
Stability	2 years (in sealed, unopened original packing)
VOC	30µGr/m³
TVOC	N/A
PH	7-8°C
Cleaning	Water and Soap
Packing	0.750LT
